

GAURAV SETIA

Android & Mobile Platform Engineer | BITS Pilani (M.Tech)

gsetia402@gmail.com | +918920895002

LinkedIn: <https://linkedin.com/in/gaurav-setia-ab46a057>

SUMMARY

Mobile Engineer with 12+ years of experience building scalable Android, React Native, and backend-driven applications. Strong expertise in Kotlin, modern Android architecture, distributed systems, and production reliability. Experienced in building real-time consumer and technician-facing platforms focused on performance optimization, cloud integrations, and intelligent mobile experiences.

EDUCATION

M.Tech — Birla Institute of Technology and Science (BITS), Pilani

B.Tech — Arya Institute of Engineering & Technology, Jaipur

EXPERIENCE

Mobile Platform Lead — Sears Holding, Pune

Dec 2021 – Present

- Leading development for scalable consumer-facing smart home application(Kenmore) and technician-facing (Sears Home Services) mobile applications at scale
- Owning end-to-end feature delivery across applications, including architecture, real-time synchronization, cloud integration, production monitoring, and release management
- Designed scalable and maintainable systems using Clean Architecture and modularization, improving development efficiency and code quality
- Built reliable real-time communication systems using MQTT, BLE, Wi-Fi, and REST APIs, improving device connectivity success rate by ~30%
- Improved application stability and performance by reducing crash rates by 30%+ and optimizing memory usage, startup time, and network efficiency
- Implemented offline-first architecture with caching, retries, and eventual consistency to improve reliability under unstable network conditions
- Led development of technician-facing applications using React Native while mentoring a team of 5–8 engineers
- Worked on hybrid mobile experiences involving WebView integrations, staged rollouts, monitoring, and reliability optimization

Senior Android Developer — Programming.com, Gurgaon

Feb 2020 – Dec 2021

- Delivered multiple Android applications (50K+ downloads) using MVVM and Clean Architecture
- Designed scalable and maintainable mobile systems with modular components
- Mentored developers and collaborated with clients to deliver production-grade solutions

Android Developer — OFBusiness, Gurgaon

Sep 2019 – Jan 2020

- Built cross-platform applications using React Native and integrated REST APIs
- Improved application responsiveness and created technical documentation

Android Developer — GoParties (BoxEngage), Gurgaon

Jul 2016 – Sep 2019

- Built and scaled mobile applications from scratch in a startup environment
- Owned feature delivery end-to-end from development to production

IBizz Technologies — Android Developer

Jan 2015 – Jul 2016

Tech Mahindra — Support Engineer (Networking)

Feb 2014 – Dec 2014

TECHNICAL SKILLS

Languages: Kotlin, Java, JavaScript

Mobile: Android SDK, Jetpack, MVVM, Clean Architecture, WebView Integration

Cross-Platform: React Native

Modern Android: Coroutines, Flow, Jetpack Compose, Paging, WorkManager

IoT & Connectivity: MQTT, BLE (GATT), Wi-Fi

Backend/Cloud: REST APIs, Firebase, AWS, Spring Boot, Python Flask

AI & ML: ML Kit, AI-assisted workflows, Intelligent mobile experiences

Tools: Git, CI/CD, Play Store Deployment, Crash Monitoring

Testing: JUnit, Espresso

SYSTEM DESIGN & ARCHITECTURE

- Scalable mobile architecture using Clean Architecture and modularization
- Real-time data synchronization across mobile, cloud, and IoT systems
- Offline-first systems with caching, retries, and eventual consistency
- Distributed system interaction and API design for performance and scalability
- Production monitoring, debugging, staged rollouts, and release management for high-availability applications
